The indicated allowability of claims 15, 18 and 20-39 is withdrawn in view of the newly discovered reference(s) to Whayne et al (US 6,402,746). Rejections based on the newly cited reference(s) follow.

***Claim Objections***

Claims 18 and 35 are objected to because of the following informalities:

Regarding claim 18, on line 5, "do" is grammatically awkward; it could be changed to ---so--- in order to overcome this objection.

Regarding claim 35, the language "modifying the tissue structure" lacks antecedent basis. Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 15, 18, and 20-39 are rejected under 35 U.S.C. 102(e) as being anticipated by Whayne et al (US 6,402,746). Whayne anticipates the claim language where the assessing step as claimed is disclosed on column 1, lines 16-24 of Whayne, the determining steps as claimed are disclosed on column 1, lines 54-67 as well as on column 1, lines 16-24, and the deploying step as claimed is disclosed on column 1, lines 54-67 and column 2, lines 15-21. The steps of leaving the device in the body or

implanting the device as claimed is met by or read on by the treatment step of Whayne because the length of time that this step is performed is not specified.

Regarding claim 24, the Applicant is directed to column 22 of Whayne.

Regarding claim 26, the Applicant is directed to column 13, lines 26-27 of Whayne.

Regarding claim 27, the Applicant is directed to column 29, lines 22-32 of Whayne.

Regarding claim 37, the electrodes (28) or the wire (106) of Whayne act as barbs to the extent that this language can be given patentable weight; see Figures 3A, 15B, 16C, 24, 61, 63C and 69.

### ***Conclusion***

Applicant should specifically point out the support for any amendments made to the disclosure, including the claims (MPEP 714.02 and 2163.06). Due to the procedure outlined in MPEP 2163.06 for interpreting claims, it is noted that other art may be applicable under 35 USC 102 or 35 USC 103(a) once the aforementioned issue(s) is/are addressed.

Applicant is respectfully requested to provide a list of all copending applications that set forth similar subject matter to the present claims. A copy of such copending claims is respectfully requested in response to this Office action if the application is not stored in image format (i.e. the IFW system) or published.
